

Standard are the Obvious Con-Serv Qualities:

User Friendly ■ Quality Construction ■ Performance ■ Low Cost to Operate ■ Inexpensive to Purchase

NEW SOURCE MEMBRANE SYSTEM

Re-use your water with a Con-Serv New Source Rinse Water Membrane System

**Choose from:
12, 18, or 24 Membrane System**

The New Source Technology of creating clean clear water from wastewater is now a reality!

The new Wastewater Membrane Technology will provide good, clear pre-rinse or clean, high-quality wash water. The water produced is equivalent to a pore size of 0.01 microns.

The new Ultra Filter Membranes are one inch in diameter, ten feet long, and sold in clusters of 12, 18, and 24. Custom systems with multiple pumping stations can be manufactured to accommodate most any application. The standard systems can produce 1500 – 2200 GPD and up to 3600 GPD with the 24-membrane, 7.5 HP unit. The New Membrane concept is simple, reliable, and requires very little maintenance.
