Featured Product

SERIES II Self Contained Slim Series

THE ENTIRE COMPONENT PACKAGE IS HOUSED IN A COMPACT 16" X 54" ENCLOSURE!

This model features all stainless steel plumbing, filters and components mounted in a sturdy, lightweight aluminum frame with water tight FRP Covering. Complete with UL Listed control system, vortex particle separator and Con-Serve Mfg's Self Cleaning SS Filter.

- 65 and 100 GPM Models Available
- All Stainless Steel Plumbing, Filter, and Components
- Mounted in a Sturdy, Lightweight Aluminum Frame with Water Tight FRP Covering
- U/L Listed Electrical Control System
- Vortex Particle Accelerator
- Features Con-Serve's Amazing New Patent Pending 6.5 Second Self Cleaning Stainless Filter with Lifetime Warranty

**** The flow of reclaim water is filtered down to the size of a single white blood cell with no possible chance of blow-by unfiltered water.**

In the News...

Amidst growing water scarcity, and concern about the future availability and quality of water, a new GE consumer survey unveiled in October indicates that Americans strongly support reusing water to help the U.S. drive economic competitiveness and protect the environment.

Despite the "icky factor" often associated with recycled water, two thirds of Americans (66 percent) feel positive about water reuse, according to the survey of 3,000 consumers in the U.S., China and Singapore. The survey reports that Americans also think that industry and government should play a stronger role in making water reuse a priority.

This is a significant finding, considering that 36 U.S. states face water shortages in the coming year¹, and by 2025, two-thirds of the world's population—or 5.3 billion people—will be vulnerable to water shortages².

While the majority of Americans hesitate at the concept of "toilet-to-tap" recycling, more than 80 percent of Americans surveyed indicated that they support using recycled water for many "toilet-to-turf" uses – activities that require significant amounts of non-potable water, such as agricultural irrigation, power generation, landscaping, industrial processing and manufacturing, toilet flushing, and car washing.

In the News...

Observations from the study:

31% of Americans don't know where their water comes from (China – 14% - Singapore 75)

83% are concerned about the availability of clean water

80%+ strongly support using recycled water for most non drinking uses

84% feel that water resources should be a national priority

80%+ feel that it is important to use recycled water

44% would pay more to ensure that future generations would be less vulnerable to water shortages

On the Web...

Just a reminder – Our website is full of information on the technologies and the Con-Serve products. You can view information about the technologies on our products page , additionally click on the product cut sheet page to get specific product information.

Come see us at the show:

Its that time of year again and we have been busy planning to exhibit at the shows. The first 2 coming up are:

Southwest Carwash Association – Feb 17th to 19th

International Carwash Association – Apr 22nd to 24th

Maintenance Reminder: - Don't look now – but you have spider webs all over the place. Take the time out to remove them. Not only do they attract other living creatures, they can also become a fire hazard. Makes the place look good too.

Con-Serv Jokes Corner

BAR CRAWL

A man drinks at the pub until they close.

He stands up to leave and falls flat on his face. He tries to stand one more time and falls again. He figures he'll crawl outside and get some fresh air and maybe that will sober him up.

Outside, he tries to stand up and falls flat again. He gives up and crawls the four blocks to his house, crawls up the stairs and pulls himself into bed.

The next morning, his wife stands over him shouting, "So, you've been out boozing again!"

"What makes you say that?" he asks, putting on an innocent face.

"The pub called -- you left your wheelchair there again."

MENTAL INSTITUTION POP QUIZ

Jon and Dan are in a mental institution which has an annual contest that picks two of the best Patients and gives them two questions. If they answer correctly, they are released.

Jon is called into the doctor's office first. The doctor says, "Jon, what would happen if I poked out one of your eyes?" Jon says, "I'd be half blind." "That's correct. What would happen if I poked out both your eyes?" "I'd be completely blind."

The doctor tells him that he is free to go. On Jon's way out he tells Dan the questions and answers.

The doctor asks Dan, "What would happen if I cut off one of your ears?" Dan says, "I'd be half blind." The doctor, slightly puzzled, continues, "What would happen if I cut off both your ears?"

"I'd be completely blind."

"Dan, how can you explain that you'd be blind?" asks the doctor.

"Well," replies Dan, "my hat would fall over my eyes."
