

THE GREEN REVOLUTION . . .
CLEANING UP AND GREENING UP
THE ENVIRONMENT WITH
BioZone

Conservation. Recycling. Zero Footprint. Pollution-buster. Eco-friendly. The words of the Green Revolution. But they're not just buzz words of the Green Revolution, they're words descriptive of BioZone -- it cleans up and greens up the Environment!

Consider the benefits of offering the most effective, environmentally friendly biological product to your customers, complete with the EPA Design for the Environment Logo. BioZone is environmentally safe and preferred. That's because it's naturally occurring, biodegradable, and pathogen free. But it's not just the safe and natural ingredients that make it environmentally preferred – it's what BioZone does. Bio Zone cleans wash water of petroleum contaminants through biological digestion, resulting in a significantly positive environmental impact. Cleaned water can be recycled and conserved, saving the wash-owner money and saving our environment. When the water is clean, it should smell clean too—no more hydrogen sulfide odors with BioZone.

BioZone proudly displays the EPA's Design for the Environment (DfE) logo, in recognition of its meeting the EPA's challenge to formulate products with a minimal environmental impact and made safer for human handling. BioZone meets that challenge, demonstrating a more positive human health and environmental profile.

The EPA DfE logo is available for display on approved products through our private label program. Offer your customer an effective, cost-saving —green product, with the strongest, most credible environmental statement – the EPA DfE Logo. Ask for BioZone today!
